The Mission - Teach Challenge Transform

At St Francis Xavier:

All children will realise their full potential,

in an atmosphere which reflects Gospel values.

We will achieve this by:

- Nurturing an environment in which all people are accepted, valued and supported
- Encouraging in students a sense of dignity, courtesy, compassion and self-discipline
- Providing a distinctive catholic education with a relevant and inclusive approach to religious education and the religious life of the school
- Educating students to be successful, creative, confident, and empowered to enrich our world
- Respecting and celebrating the diversity of our community where all cultures are appreciated

Our School Context

St Francis Xavier is a Catholic, co-educational P-6 school of approximately 534 students situated in the City of Ipswich, adjacent to the Ipswich Motorway. The school was established in 1910.

It is a school which has welcomed children and families from many countries around the world. Over forty nationalities are represented. We are proud of the way that our community blends the best from these cultures to develop and reflect the motto of the school: "Kids Who Care".

At St Francis Xavier School, we pride ourselves on working together as a community for the benefit of our children. We have a strong belief that learning is a lifelong endeavour and that we can all learn from each other. This belief is tightly aligned with our mission statement and with our beliefs and values about teaching and learning.

Vision for Learning

Our vision for learning is that all children will realise their full potential, and be successful, creative and confident learners, who are empowered to enrich our world (Appendix C).

Our Beliefs

Our beliefs about student behaviour, discipline and learning unify us and direct our action – the decisions we make, the practices we choose and how we interact with others. The following beliefs reflect current literature in positive behaviour supports.

- Schools play a vital role in promoting the intellectual, physical, social, emotional, moral and spiritual and aesthetic development and wellbeing of young Australians (Melbourne Declaration)
- Every day at school, students have the opportunity to learn and practise social skills and develop General Capabilities through the curriculum (ACARA)
- Behaviour is learned, therefore responsible behaviour can be taught
- Student discipline is best achieved through instruction and re-teaching, rather than punishment
- Student behaviour can be taught using the same strategies used to teach academics
- Misbehaviour presents the student with an opportunity to learn and the educator with an opportunity to teach
- For behaviour change to occur, we must use positive approaches that strengthen teacher-student relationships
- Student discipline is a collaborative effort. In partnership with parents and carers, we are committed to each and every student’s success
- Efforts to support all students to become successful learners, confident and creative individuals and active and informed citizens require ongoing teaching, encouragement and correction
- Students need and want high standards for their behaviour. Maintaining high expectations does not require “get tough” or punitive approaches
- An integrated system of school wide, classroom support and individual student supports can play a central role in improving behavioural outcomes and developing learning disposition for the students we serve as well as contribute to the sense of efficacy and job satisfaction of our staff
- Services for students with chronic or intense behaviours are more effective within the context of school-wide commitment to the social and academic development of all students

“In learning you will teach, and in teaching you will learn.”

Phil Collins
Our Approach - Positive Behaviour 4 Learning

What is Positive Behaviour 4 Learning?
PB4Learning is about people, practices and processes – it is not a program but the way we do work. A focus on learning, capability building, wise and thorough use of data, and identifying and spreading good evidence-based practice are all integrated into the PB4Learning strategy.

Theoretical and conceptual characteristics

The theoretical and conceptual understandings of PB4Learning are firmly linked to Behavioural Theory and Applied Behavioural Analysis (Carr et al., 2002). This perspective emphasises that observable behaviour is an important indicator of what individuals have learned and how they operate in their environment, behaviour is learned and rule governed, environmental factors are influential in determining whether a behaviour is likely to occur and new and alternative pro-social behaviours can be taught (Sugai & Horner, 2002; Sugai et al., 2008).

Continuum of support and key features

An important component of PB4Learning is the adoption of a continuum of behavioural supports that, like academic instruction, acknowledges that students will need differing levels of behavioural interventions and supports to be successful at school. Within the continuum there are three levels of support.

In the same way, let your light shine before others, so that they may see your good works and give glory to your Father who is in heaven.

Matthew 5:16
The first level (Green Zone) focuses on universal behaviour and academic supports for all students. Here the focus is on prevention of problem behaviours, providing early intervention for those at risk and creating positive learning environments across all settings in the school.

Research has shown that approximately 80-85% of students will respond to proactive universal supports, display the desired appropriate behaviours, and have few behaviour problems (Horner & Sugai, 2005; Lewis, Newcomer, Trussell & Ritcher, 2006).

At St Francis Xavier Goodna, our staff use a variety of classroom management strategies, some of which are listed below:

- Traffic light
- Rocket ship
- Ladders
- Superstars

Visual examples of these can be seen in the appendix D.

All students begin the day where the classroom teacher has deemed the ‘green zone’. Students move up and down the strategy used as they are retaught behaviours and begin to practise them. All classrooms at St Francis Xavier use learning language as opposed to behaviour language. This supports the fact that the classroom is a place for learning and teaching to occur.

All whole class management strategies are to encourage students to demonstrate characteristics of a good learner. At the beginning of each year classroom teachers work with their students to define what a good learner in each class looks like. As a whole school we RECAP – see appendix E.

The second level (Yellow Zone) focuses on students who continue to display problem behaviour even with the universal supports in place. Through the use of data, students are identified early, before problem behaviours become intense or chronic, and receive Targeted supports such as small group social skill instruction, academic supports and self-management strategies (Sailor et al., 2013).

At St Francis Xavier, teachers will move students within the room to refocus them on their work, they will move them to a neighbouring classroom for ‘time out’, or students are sent to the office to reflect on their continued inappropriate behaviour choices, or to complete work they have not been able to focus on during class time.

Finally, the tertiary level (Red Zone) of support is intensive or individualised. These students will require highly individualised behaviour support programs based on a comprehensive behavioural assessment, which at times, will include mental health professionals and family and community services.
A relentless focus on learning for all students

Our Expectations

School-wide expectations encourage consistent communications and establish an effective verbal community for all staff and students and across all settings. Agreed upon student expectations promote consistency across the staff and school community and help develop similar tolerance levels.

At St Francis Xavier our school-wide behaviour expectations are:

- Be Safe
- Be Respectful and Caring
- Be a Learner

Our school-wide matrix determines the social skills and behaviours we expect all students and staff to learn, practise and demonstrate. They allow us to teach proactively and to provide students and parents with a positive message about discipline.
In addition to our school-wide expectations our affective curriculum is informed by the General Capabilities in the Australian Curriculum. The general capabilities encompass the knowledge, skills, behaviours and dispositions that, together with curriculum content in each learning area and the cross-curriculum priorities, will assist students to live and work successfully in the twenty-first century.

Personal and social capability, ethical understanding and Intercultural understanding focus on ways of being, behaving and learning to live with others while critical and creative thinking is fundamental in students becoming successful learners. The ACARA learning continuum for each capability describes the knowledge, skills, behaviours and dispositions that students can reasonably be expected to have developed at particular stages of schooling.

Personal and social capabilities can be read in appendix F.

We begin our school year with each class participating in a Belonging Unit. With this unit we look at My Story (that of each individual), Our Story (the school story) and The Story (the Gospel story, the story of Jesus).

This unit culminates with each class creating a classroom covenant. The promises for the covenant come from learning about our theme for the year, our scripture story and our school expectations. Covenants are used when discussing expectations with students when redirection is needed.
Teaching expected behaviour

Effective instruction requires more than providing the rule—it requires instruction, practice, feedback, re-teaching, and encouragement (Sprague & Golly, 2005).

Instruction takes place each day, throughout the day, all year long.

With our students we have found positive results when staff:

Remind = Regularly remind students of expected learning, expected behaviours, procedures and routines.

Supervise = Monitor student performance.

Feedback = Provide feedback.

Feedback: Encouraging Expected Behaviour

It is important to follow desired behaviours with consequences that are reinforcing to most students such as specific positive feedback along with other forms of reinforcement. Our systems encourage and motivate students, both as they are learning the expected behaviours and then to maintain those skills and dispositions as students become more fluent with their use. Specifically, our encouragement system utilises effective, specific positive feedback, adult attention both contingent and non-contingent and a tangible reinforcement system.

This is a brief overview of some strategies used

- Non-contingent adult attention: provided regardless of performance and includes such things as greeting, smiles and conversations.
- Contingent adult attention provided based upon the performance of an identified behaviour. Contingent attention is attention given after the desired behaviour takes place. The student must perform the expected behaviour before a teacher responds with attention.

We believe that both types of attention create a positive school climate and build rapport and relationships helping students to learn.

- With specific positive feedback you are recognising attainment of specified performance criteria, effort or success at tasks that are difficult for the student. This type of feedback needs to be given frequently when a student is learning a new skill and unpredictable or intermittently when a student is maintaining the skill or generalising it to a new context or setting.
- The development of a tangible system can be motivating for students creating a real sense of fun and thus contributes to the positive school climate. In addition, tangible systems can prompt staff to initiate opportunities for positive feedback and adult attention.

These components enable staff to effectively recognise and encourage students when they display expected behaviours and contribute to the creation of a positive school environment.
Classes at St Francis Xavier have:
- Kids who care.
- Prize boxes.
- Stickers and stamps.
- Students sent to the office or another teacher to share good work.
- Class celebrations.

Targeted Supports

Targeted interventions play a key role in supporting students at risk of academic and social problems and may prevent the need for more intensive interventions (Sailor et.al., 2009). These students consistently have trouble with low level but disruptive behaviours that are detrimental to instruction and interfere with their own learning. Targeted inventions should be timely and responsive and use similar strategies and social curriculum across a group of students.

Students are identified proactively, either through discipline data, attendance data, and teacher nomination or through a screening process. Our targeted supports have systems in place to monitor student progress, make modifications, and gradually decrease support as student behaviour and engagement improves.

Targeted intervention is individualised and is put in place and supported by the classroom teachers and the student support team.

Two examples of support we use at St Francis Xavier are:
- Check in Check out – The goal of using this is to prevent students who are acting out from escalation and provide them with more frequent feedback on their behaviour to prevent future problem behaviour. The student ‘checks in’ with a staff member at the beginning of each day to get their card and their goals for the day. They then ‘check out’ with the same member of staff and receive positive reinforcement for the effort they have put in to attaining their goals.
- Playground Inclusion – students who have made poor choices in the playground are placed on this system, which supports gradual inclusion back into the playground, over a two-week period.

Individualised Interventions

Successful outcomes for students whose behaviour has not responded to universal or targeted supports are dependent on our ability to intervene as early as possible with appropriate evidence-based interventions. A function-based approach is an essential feature of Positive Behaviour 4 Learning.
Functional Behavioural Assessment (FBA) is a collection of methods for obtaining information about the antecedents (things that student experiences before the behaviour of interest), behaviours (what the student does) and consequences (what the student experiences after the behaviour of interest. The purpose is to identify the reason (function) for the behaviour and to use the information to develop strategies that will support positive student performance while reducing the behaviours that interfere with the student’s successful functioning at school (Witt et al., 2000). The FBA together with the function-based intervention procedures provide the bulk of the information needed to develop an effective and long lasting Behaviour Intervention Plan that eliminates problem behaviours, increases desirable behaviours and changes settings so that desirable behaviours are more likely to occur.

Interventions linked to the function or purpose of the behaviour, have proven to be more effective than interventions that simply increase reinforcement for “appropriate” behaviour and penalties for problem behaviour (Umbreit et al, 2007).

FBA is a flexible process that can be adapted to many situations. The complexity of the process will be informed by the complexity of the situation. The FBA process and the development of an individual plan may include:

1. The collection of background information through student files and interviews with relevant stakeholders including the student and their parents
2. Observations in the classroom
3. Collaborative meetings to share information and plan effective intervention strategies
4. Teaching replacement behaviours
5. Creating routines and environments to facilitate success
6. Monitoring and evaluating the effectiveness of the behaviour plan.

At St Francis Xavier, we have staff trained in Functional Behaviour Analysis.

**Responding to inappropriate behaviours**

*The best defence is always a great offence*

Even with our positive approach to teaching and supporting appropriate behaviour, some problem behaviour will still occur. For some students, they do not know how to perform the expected behaviour or don’t know it well enough to routinely use it at the appropriate times. For other students, they are not sufficiently motivated or invested in using the appropriate behaviour even when they understand what is expected.

The process of responding to problem behaviour is much like an error analysis, which is commonly used for academic work. Students who have a “skills deficit” will need more explicit instruction and practice while students who have a “performance deficit” need more prompts and cues to highlight the need for the replacement behaviour in context and may need more intense reinforcement when they use the replacement behaviour.
A continuum of responses

To correct behavioural “errors”, we have a system in place that enables staff to efficiently and effectively respond to a range of inappropriate behaviours, from relatively minor ones, to chronic persistent minor behaviours and to more serious and major problems. This continuum thinking begins with clarity between those behaviours that can and should be managed by staff, within the context of the classroom and non-classroom settings and those that are serious enough to warrant an office referral. The definitions of teacher managed behaviours (minors) and office managed behaviours (majors) have been included in Appendix A.

Although the teacher is the key problem solver when addressing minor behaviours, they can and should collaborate with and share creative strategies with families and colleagues.

Teachers typically address minor behaviours using best practices that include correction and re-teaching. Appendix B includes a brief summary of practices that may be utilised. As with all strategies to address inappropriate behaviour, they should be done privately and with instructional demeanour.

If the inappropriate behaviour persists or intensifies, staff may cease using correctional strategies and utilise crisis prevention strategies with the intent of preventing the behaviour from escalating beyond what can be appropriately managed in the instructional environment. When required classes are evacuated and members of the leadership team escort the student to the office.

For “office managed” behaviours, the behaviour is more serious or chronic disruption, concerns for safety for the student or others, or is a potentially illegal behaviour. This will typically result in actions taken by the leadership team that may include more intensive teaching, restitution activities, strategies to help the student handle future situations or parent/carer conferences.

Learning-based consequences

Effective consequences result in greater learning and often involve learning tasks or opportunities directly related to the inappropriate behaviour. Role play or practice, reflecting on the behaviour and the alternative, arranging a situation for the student to demonstrate a skill and making amends for behaviour that impacted others are all powerful learning-based consequences. Effective consequences maintain student dignity and invite the student to take responsibility for his/her behaviour and be part of the solution. Even though consequences for inappropriate behaviour are intended to be educational, they may also be mildly aversive. That is, they require effort and should leave little incentive to repeat the inappropriate behaviour. Consequences are best when they are selected to fit the individual, the specific behaviour and setting, the frequency and severity of the behaviour. Fairness means that everyone gets what they need in order to be successful and meet the expectations.
Monitoring inappropriate behaviour

Our monitoring system for both major and minor behaviours assist us in making decisions about when to engage other supports to address the problem. Typical consideration would include:

- The student is losing instructional time because of his/her behaviour.
- The behaviour is occurring frequently, requiring substantial teacher time
- The intensity of the behaviour draws attention of those close-by causing disruption to activities.
- The student is not responding to universal supports

Figure 1 describes our Universal response and decision-making processes.

Targeted and individualised supports as a response to problem behaviour

Our evidence-based practices for targeted and individualised support have been described in the previous text. Throughout the decision making process, data is used to guide us to ask the “right” questions. The right question, asked at the appropriate time can deepen the dialog from the concerns about an issue, to precision in identifying the problems or challenges faced and the opportunities for growth or improvement (Newton et.al, 2009)

Suspensions

At St Francis Xavier we suspend students for deliberate physical and verbal aggression towards peers, staff and others. Students who have an accumulation of the same inappropriate behaviour, which has been frequently addressed, and the expected behaviour retaught, may also be suspended.

Students may be suspended for a half day and a full day. Suspensions may be internal or students may be sent home. This is determined by a member of the leadership team after considering the circumstances of the incident and individual student’s story and history. When a student is suspended, they are expected to re-enter through the school office and speak to a member of the leadership team before going to class.
Figure 1

**Behaviour for Learning Flow Chart**

**Classroom Management**

- Effective school-wide systems in place:
  - Behaviour matrix in place
  - Expectations have been taught and practiced
  - ACARA General capabilities are integrated into units of work
  - Expected behaviours are reinforced
  - Positive classroom environment (10 essential skills)
  - Effective classroom pedagogy
  - Positive reinforcement strategies in all classrooms

- Problem Behaviour Occurs
  - Teacher managed
   - Reteach behaviour
   - Reinforce appropriate behaviour/ provide corrective feedback
   - Provide additional supports e.g. prompts or cues or additional opportunities for practice
   - Collect Behaviour data.

- Student Behaviour improves: Yes → Office Referral Form completed
  - School Leadership Teams responds: 30 mins time out

- No: Office Referral Form completed
  - Support team referral and action taken
    - Student re-entry
    - Tier 2 strategies
      - Eg: check-in, check out

- Student behaviour improves: Yes → Support team referral and action taken
  - No: Support team referral and action taken

**Leadership Team Managed**

- Severe behaviours, eg: intentional swearing, extreme/ deliberate verbal aggression, physical aggression

Adapted from the University of Missouri Centre for School-wide behavior Support, 2013

</tr>
</thead>
<tbody>
<tr>
<td>1 Inappropriate verbal language</td>
<td>Student engages in low intensity instance of inappropriate language</td>
<td>Calling someone an “idiot”, swearing if they kick their toe</td>
</tr>
<tr>
<td>2 Physical contact</td>
<td>Student engages in non-serious, but inappropriate contact</td>
<td>Pushing in the tuckshop line</td>
</tr>
<tr>
<td>3 Defiance/non-compliance</td>
<td>Student engages in brief or low intensity failure to respond to adult requests</td>
<td></td>
</tr>
<tr>
<td>4 Minor Disruption</td>
<td>Student engages in low intensity, but inappropriate disruption</td>
<td>Calling out, talking to a peer in class</td>
</tr>
<tr>
<td>5 Uniform violation – Minor</td>
<td>Students wears clothing that is near but not within the school’s dress code</td>
<td>Wrong socks, wrong shorts for sport</td>
</tr>
<tr>
<td>6 Technology Violation - Minor</td>
<td>Student engages in non-serious but inappropriate (as defined by the school) use of mobile phone, mp3 player, camera and/or computer</td>
<td></td>
</tr>
<tr>
<td>7 Property misuse</td>
<td>Student engages in low intensity misuse of property</td>
<td>Using equipment contrary to its design or purpose</td>
</tr>
<tr>
<td>8 Late</td>
<td>Students arrive late to class</td>
<td>Tardy late to class not late to school as this is often beyond the control of a primary school student</td>
</tr>
<tr>
<td>9 Out of Bounds</td>
<td>Student is in an area within the school grounds that has been designated “off limits” at that particular time</td>
<td></td>
</tr>
<tr>
<td>10 Lying/Cheating</td>
<td>Student engages in “White Lies”</td>
<td></td>
</tr>
<tr>
<td>11 Teasing</td>
<td>Isolated inappropriate comments (ongoing teasing would fit under bullying)</td>
<td></td>

<td>Student is in possession of or is using illegal drugs/substances or imitations or is using prescription drugs contrary to their doctor’s directions</td>
<td></td>
</tr>
<tr>
<td>12 Use/possession of combustibles</td>
<td>Student is in possession of substances/objects readily capable of causing bodily harm and/or property damage (matches, lighters, firecrackers, gasoline, lighter fluid)</td>
<td></td>
</tr>
</tbody>
</table>
### Strategies to Manage Minor Behaviour

<table>
<thead>
<tr>
<th>Technique</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Proximity</td>
<td>Every teacher knows how effective it is to stand near a child who is having difficulty. This technique is the strategic placement/movement by the teacher in order to encourage positive behaviour. The teacher is a source of support and strength and helps the student to control his impulses by her proximity.</td>
</tr>
<tr>
<td>Signal</td>
<td>Teachers have a variety of signals that communicate to the student what is expected. These non-verbal techniques include such things as eye contact, hand gestures, a card system, picture cues, etc. Such simple cues suggest that the teacher is aware of the student’s behaviour and is prepared to intervene if the behaviour continues. This works best when the teacher has a relationship with the student(s) and the non-verbal cues have already been taught to the group.</td>
</tr>
<tr>
<td>Ignore/Attend/Praise</td>
<td>This technique is based on the power of praise or specific positive feedback. The teacher praises an appropriately behaving student in proximity to the inappropriately behaving student. The praise serves as an indirect prompt for the misbehaving student and reinforcement for the one behaving appropriately. When the student exhibits the appropriate behaviour, attention and praise is then provided.</td>
</tr>
<tr>
<td>Restitution</td>
<td>“Involves having the student compensate for any damage that is a result of his or her actions. Restitution is required to repair any damage done, restore the environment to its original condition, or make amends to persons who were affected by the behaviour”. (p.453 Scheuermann &amp; Hall, 2012)</td>
</tr>
<tr>
<td>Re-Direct</td>
<td>This strategy employs a very brief, clearly and privately stated verbal reminder of the expected behaviour. A re-direct includes a specific restatement of the schoolwide, non-classroom or classroom rule/procedure. A re-direct emphasis the “what” of the behaviour instead of the “why”.</td>
</tr>
</tbody>
</table>
## Strategies to Manage Minor Behaviour (cont)

<table>
<thead>
<tr>
<th>Re-teach</th>
</tr>
</thead>
<tbody>
<tr>
<td>Re-teaching builds on the re-direct above and re-teaches the specific expectation in question and reminds of the procedures or routine for doing so. It capitalises on the teachable moment to review the expectation more thoroughly yet briefly. As in all instruction, you label the skill, teach and show, and give the student the immediate opportunity to practise demonstrating the behaviour. Once the student uses the appropriate behaviour, specific positive feedback should follow.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Provide Choice</th>
</tr>
</thead>
<tbody>
<tr>
<td>Providing choice can be used when re-directs or re-teaching have not worked. This is the statement of two alternatives – the preferred or desired behaviour or a less preferred choice. When options are paired in this way, students will often make the preferred choice. Pause after providing the choice, and when the student chooses wisely, provide praise.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Student Conference</th>
</tr>
</thead>
<tbody>
<tr>
<td>This is a lengthier re-teaching or problem solving opportunity when behaviour is more frequent or intense. The behaviour of concern is discussed, the desired behaviour is taught, and a plan is made to ensure the behaviour is used in the future. A student conference might include practice.</td>
</tr>
</tbody>
</table>

Appendix C

Our vision for learning is all children will realise their full potential, and be successful, creative and confident learners who are empowered to enrich our world.
Appendix D
Appendix E

Growing as Successful Learners

Collaborate
I participate and value others as we grow together in a learning community.

Actively Learn
I question, I wonder, I take responsibility.

Engage in persistence
I stick at it and never give up, even when it's hard.

Reflect
I know where I am, where I need to go and how to get there.

Problem solve
I take risks, I challenge myself. I am creative. I know errors are opportunities to grow and learn.

<td>recognises and identifies how their emotions influence the way they feel and act</td>
<td>express their emotions constructively in interactions with others</td>
<td>describe ways to express emotions to show awareness of the feelings and needs of others</td>
<td>identify and describe strategies to manage and moderate emotions in increasingly unfamiliar situations</td>
<td>explain the influence of emotions on behaviour, learning and relationships</td>
<td>forecast the consequences of expressing emotions inappropriately and devise measures to regulate behaviour</td>
<td>consider control and justify their emotional responses, in expressing their opinions, beliefs, values, questions and choices</td>
<td></td>
</tr>
<tr>
<td><strong>Develop self-discipline and set goals</strong></td>
<td>make a choice to participate in a class activity</td>
<td>follow class routines to assist learning</td>
<td>set goals in learning and personal organisation by completing tasks within a given time</td>
<td>explain the value of self-discipline and goal-setting in helping them to learn</td>
<td>analyse factors that influence ability to self-regulate; devise and apply strategies to monitor own behaviour and set realistic learning goals</td>
<td>critically analyse self-discipline strategies and personal goals and consider their application in social and work-related contexts</td>
<td></td>
</tr>
<tr>
<td><strong>Work independently and show initiative</strong></td>
<td>attempt tasks with support or prompting</td>
<td>attempt tasks independently and identify when and from whom help can be sought</td>
<td>work independently on routine tasks and experiment with strategies to complete other tasks where appropriate</td>
<td>consider, select and adopt a range of strategies for working independently and taking initiative</td>
<td>assess the value of working independently, and taking initiative to do so where appropriate</td>
<td>critique their effectiveness in working independently by identifying enablers and barriers to achieving goals</td>
<td></td>
</tr>
<tr>
<td><strong>Become confident, resilient and adaptable</strong></td>
<td>identify people and situations with which they feel a sense of familiarity or belonging</td>
<td>identify situations that feel safe or unsafe, approaching new situations with confidence</td>
<td>undertake and persist with short tasks, within the limits of personal safety</td>
<td>persist with tasks when faced with challenges and adopt their approach where first attempts are not successful</td>
<td>devise strategies and formulate plans to assist in the completion of challenging tasks and the maintenance of personal safety</td>
<td>assess, adopt and modify personal and safety strategies and plans, and revisit tasks with renewed confidence</td>
<td></td>
</tr>

<tbody>
<tr>
<td><strong>Social awareness element</strong></td>
<td>Appreciate diverse perspectives</td>
<td>acknowledge that people hold many points of view</td>
<td>describe similarities and differences in points of view between themselves and people in their communities</td>
<td>discuss the value of diverse perspectives and describe a point of view that is different from their own</td>
<td>explain how means of communication differ within and between communities and identify the role these play in helping or hindering understanding of others</td>
<td>acknowledge the values, opinions and stances of different groups within society and compare to their own points of view</td>
<td>articulate their personal value system and analyse the effects of actions that repress social power and limit the expression of diverse views</td>
</tr>
<tr>
<td></td>
<td>Contribute to civil society</td>
<td>describe ways they can help at home and school</td>
<td>describe how they contribute to their homes, classrooms and local communities, and how others care for and assist them</td>
<td>identify the various communities to which they belong and what they can do to make a difference</td>
<td>identify a community need or problem and consider ways to take action to address it</td>
<td>analyse personal and social roles and responsibilities in planning and implementing ways of contributing to their communities</td>
<td>plan, implement and evaluate ways of contributing to civil society at local, national, regional and global levels</td>
</tr>
<tr>
<td></td>
<td>Understand relationships</td>
<td>explore relationships through play and group experiences</td>
<td>identify ways to care for others, including ways of making and keeping friends</td>
<td>describe factors that contribute to positive relationships, including with people at school and in their community</td>
<td>identify the differences between positive and negative relationships and ways of managing those</td>
<td>identify indicators of possible problems in relationships in a range of social and work related situations</td>
<td>explain how relationships differ between peers, parents, teachers and other adults, and identify the skills needed to manage different types of relationships</td>
</tr>
</tbody>
</table>
## Personal and Social Capability learning continuum

<thead>
<tr>
<th>Sub-element</th>
<th>Level 1a Typically, by the end of Foundation Year, students:</th>
<th>Level 1b Typically, by the end of Year 2, students:</th>
<th>Level 2 Typically, by the end of Year 4, students:</th>
<th>Level 3 Typically, by the end of Year 6, students:</th>
<th>Level 4 Typically, by the end of Year 8, students:</th>
<th>Level 5 Typically, by the end of Year 10, students:</th>
<th>Level 6 Typically, by the end of Year 12, students:</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Communicate effectively</strong></td>
<td>identify positive ways to initiate, join and interrupt conversations with adults and peers</td>
<td>discuss the use of verbal and nonverbal communication skills to respond appropriately to adults and peers</td>
<td>identify communication skills that enhance relationships for particular groups and purposes</td>
<td>identify and explain factors that influence effective communication in a variety of situations</td>
<td>analyse enablers of and barriers to effective verbal, nonverbal and digital communication</td>
<td>formulate plans for effective communication (verbal, nonverbal, digital) to complete complex tasks</td>
<td></td>
</tr>
<tr>
<td><strong>Work collaboratively</strong></td>
<td>share experiences of cooperation in play and group activities</td>
<td>identify cooperative behaviours in a range of group activities</td>
<td>describe characteristics of cooperative behaviour and identify evidence of these in group activities</td>
<td>contribute to groups and teams, suggesting improvements in methods used for group investigations and projects</td>
<td>assess the extent to which individual roles and responsibilities enhance group cohesion and the achievement of personal and group objectives</td>
<td>critique their ability to devise and enact strategies for working in diverse teams, drawing on the skills and contributions of team members to complete complex tasks</td>
<td></td>
</tr>
<tr>
<td><strong>Make decisions</strong></td>
<td>respond to the feelings, needs and interests of others</td>
<td>identify options when making decisions to meet their needs and the needs of others</td>
<td>practice individual and group decision making in situations such as class meetings and when working in pairs and small groups</td>
<td>contribute to and predict the consequences of group decisions in a range of situations</td>
<td>identify factors that influence decision making and consider the usefulness of these in making their own decisions</td>
<td>assess individual and group decision-making processes in challenging situations</td>
<td>develop and apply criteria to evaluate the outcomes of individual and group decisions and analyse the consequences of their decision making</td>
</tr>
<tr>
<td><strong>Negotiate and resolve conflict</strong></td>
<td>listen to others’ ideas, and recognise that others may see things differently from them</td>
<td>practise solving simple interpersonal problems, recognising there are many ways to solve conflict</td>
<td>identify a range of conflict resolution strategies to negotiate positive outcomes to problems</td>
<td>identify causes and effects of conflict, and apply different strategies to diffuse or resolve conflict situations</td>
<td>assess the appropriateness of various conflict resolution strategies in a range of social and work-related situations</td>
<td>generate, apply and evaluate strategies such as active listening, mediation and negotiation to prevent and resolve interpersonal problems and conflicts</td>
<td></td>
</tr>
</tbody>
</table>
